

# Patient information

Dear patients,

On January 1, 2018, the revised dental tariff between the Swiss Dentists-SSO company and federal social security accident, military and disability insurance (UV/MV/IV) came into force.

Our tariff for private patients (DENTOTAR®) is closely based on this tariff in structure and organization. Therefore, you will find new tariff items and, above all, a new rate point value on your dentist's bill in the future. However, since we have always compensated the accumulated inflation in the private tariff in recent years, you do not have to reckon with higher treatment costs.

**The tax point value UV/MV/IV is now CHF 1.00**

**The tax point value for private patients is now CHF 1.15**

Thus, the tax point for private patients is close to the tax point for social insurance cases (UV/MV/IV).

Compulsory health insurance (OKP) benefits are covered by this tariff revision not affected. For the time being, the old rate with the CHF3.10 rate point value will apply there. (KVG value).

For supplementary health insurance for dental treatment (according to VVG), the revised tariff is applied for, and the invoice can be submitted to the health insurance companies as before.

Please contact us if you have problems with your insurance or if you have any other questions. We are at your disposal.

Your dental practice Dr. Bianca Cordey-Rosenkranz
